

About RLTSOURCE, LLC

We at RLTSOURCE set out to pursue a lifestyle of balance and health for our family. We searched for natural products with the best ingredients that would contribute to our own health and well-being. As an overflow of our discoveries, we are now offering this to others who would also benefit from our research and experience. We have found excellent skincare products that we ourselves use and can personally testify to their quality and effectiveness. We maintain a commitment to products that not only have cosmetic benefits, but also contribute to our overall health. As such, we only offer paraben-free products in the Bethesda Springs Botanicals line.

We offer Solutions with Integrity to meet legitimate needs with outstanding service and personal attention.

- **Bethesda:** from the 5th chapter of the Book of John was a place of healing.
- **Springs:** refer to the source
- **Botanicals:** are products extracted from plant life

Vitamin C 20 Serum: Our micro-encapsulated Vitamin C 20% Gel is very stable. It offers maximum daily antioxidant protection and greater penetration than other Vitamin C products. The greater the penetration, the greater the antioxidant benefit to your skin. It neutralizes free radicals to prevent skin cell damage. Professional strength Vitamin C can give your skin the superior protection it needs to (a) Prevent premature signs of aging, including fine lines and wrinkles, (b) Protect against future damage, (c) Stimulate collagen production for firmer, more resilient skin, and (d) Lighten and brighten skin for more even tone.

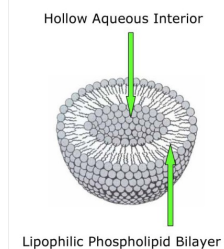

Vitamin C or L-ascorbic acid or L-ascorbate is an essential nutrient for humans. Ascorbate acts as an antioxidant by protecting the body against oxidative stress. Application of Vitamin C protects against UV induced cell damage. It is this sun damage that not only causes premature aging but also skin cancers. It is also a cofactor in at least eight enzymatic reactions including several collagen synthesis reactions that, when dysfunctional, cause the most severe symptoms of scurvy. These reactions are especially important in wound-healing and in preventing bleeding from capillaries.

Ascorbate (an ion of ascorbic acid) is required for a range of essential metabolic reactions in all animals and plants. Deficiency in this vitamin causes the disease scurvy in humans. It is also widely used as a food additive. The full extent of the effects and recommended daily intake of vitamin C are matters of ongoing debate, with RDI ranging from 45 mg to 400 mg or more per day. Significantly more vitamin C is absorbed into the skin when applied topically (in the right concentrations) than if you were to merely take it orally. Our serum is good for all skin types. It improves skin tone and texture and acts as an antibacterial, as well as fight against sun damage, post laser effects, and fights pigmentation problems by retarding excessive melanin production.

Our C 20% formula is truly an amazing one with a unique concept. Imagine using some of this serum with its soft-silk touch on your face and neck and seeing immediate results!

It diminishes the appearance of fine lines and skin imperfections and improves tone and texture, giving your face and neck a slimmer, firmer look. This unique Vitamin A, C and E formula is a powerful antioxidant and moisturizer, helping your skin to look smoother and younger.

The color of many Vitamin C serums available will be found to be dark brown to black, because they already became unstable and oxidized. Once Ascorbic Acid is oxidized, it becomes a free radical and actually harms the human skin. For this reason our Vitamin C Serum is "micro-encapsulated" and provided in an airless pump bottle and has an actual shelf life of up to 3 years.
